

## **Message from the President of the Biophilia Rehabilitation Academy JAPAN**

On behalf of the Biophilia Rehabilitation Academy Japan, I am honored to welcome you at the '9th International Biophilia Rehabilitation Conference' co-organized and co-sponsored by the Medical Research Center of the Polish academy of sciences in Warsaw and the Institute of Psychology of Opole University in Poland. In addition to main conference, the Workshop Biophilia 2011 will also be held in Romania.

I hope that during this Conference we will have many productive discussions between the scientists in Japan, Romania and Poland. The Scientific Committee has prepared a diverse scientific program structured around the theme of rehabilitation. Not only will the conference address classical psychological and physical aspects of rehabilitation but also longevity and healthy aging thus preventing deteriorating quality of life in the elderly.

I hope our discussions and studies will be of great value in the future of the rehabilitation medicine.

Takuji Shirasawa, MD., Ph.D.

Prof. of Juntendo University, Graduate School of Medicine Department of Aging Control Medicine
